

You most likely know your sun sign, but you don't exactly feel like it. You may have heard "You are more than your sun sign!", but what exactly does this mean? Your astrological DNA is made up of an entire birth chart with different planetary placements, not just the sun. The three pillars of your personality, or Big Three, are your sun, moon and rising sign placements. Understanding these three energies can help you ultimately understand yourself on a deeper level. Tap into the power of your moon to heal, harness the energy of your sun to achieve, and use your rising for the strength to walk through the world.

## SUN SIGN

Your sun sign represents your ego, life path, and how you shine the brightest in this lifetime. Understanding where the sun is placed in your chart can also determine your own personal strengths and challenges. This is the sign you look up when checking your horoscope.

## MOON SIGN

Your moon sign represents your emotions, instinctual reactions, and internal world. This is also an indicator of what your inner child needs to feel nurtured. This is an extremely important placement in terms of friendships, relationships, marriage, and your home.

## RISING SIGN / ASCENDANT

Your rising sign, also known as the ascendant, is determined by which astrological sign was on the eastern horizon the moment you were born. This placement determines your appearance, personality, how you present yourself to the outside world and how you are perceived.
